

About Project

CourtX is a mobile application designed to simplify the process of discovering, booking, and managing sports activities in one unified platform. The app connects players with nearby sports clubs, courts, tournaments, and matches across multiple sports, eliminating the fragmentation and manual coordination often involved in sports planning.

CourtX enables users to:

- Browse and book available sports courts and facilities
- Discover ongoing tournaments and competitions
- Join or complete matches by finding other players
- Manage bookings, schedules, and participation seamlessly
